U.S. Army Air Defense Artillery School

COURSEWARE DEVELOPMENT

All TATS courseware conversion has been developed

Courses being taught by the TTBNs are 14M, 14S, 14T, and 14R. 14E and 14J currently are not, 14J is scheduled for a pilot in the future.

PROPONENT INTIATIVES AFFECTING TASS

- **Assignment Oriented Training has had a positive impact on both the AC and RC.**
- **14J School rearranged the course so that a soldier assigned SHORAD unit will receive the 14J MOS after 10 weeks of trai**
- **A soldier assigned to a Patriot unit will remain for an additi 9 weeks of training and receive an ASI.**
- **The 10 week length of time to receive the 14J MOS is easily by the RC to fit into one TATS training year.**

PROPONENT ISSUES AFFECTING TASS

- **The length of time to certify RC Instructors**
- **For Example: The current 14J 19 week course takes approxi 1 year. Due to the complexity of the MOS 6th BDE Recomme 3 iterations to become instructor certified**
- **TRADOC Reg 350-70 recommends at least 2 iterations**
- **Funding and finding RC instructors for this length of time**
